PROFILE

Professional with over 7 years of experience in Quality Control and Quality Assurance across manufacturing and software development industries. Possess a strong background in ISO 9001 quality management, internal auditing, SOP compliance verification, and continuous improvement initiatives. Currently transitioning into a QA Automation Engineer specialized in developing automated End-to-End (E2E) testing using Cypress and conducting performance testing using Grafana k6. Experienced in executing Load Testing, Stress Testing, and Spike Testing to evaluate backend system stability, scalability, and response performance under concurrent traffic. Skilled in monitoring and analyzing server resources using tools such as htop to identify bottlenecks related to CPU usage, authentication processing, password hashing, and backend concurrency handling. Strong analytical mindset with proven ability to perform root cause analysis, technical debugging, and cross-functional collaboration to ensure product quality and system reliability.

EDUCATION

Janabadra University – Bachelor of Informatics Engineering
GPA: 3.65/4.00

STM Pembangunan Yogyakarta – 4-Year Education Program (2014–2018)
Major: Automotive Body Repair & Painting
4th Year: Industrial Internship

WORK EXPERIENCE

Golden Digital - Yogyakarta

Automation QA Engineer | *February 2026 – Present*

- Developing comprehensive test cases and coding test scripts for End-to-End (E2E) testing using the Cypress framework.
- Searching, analyzing, and identifying bugs in-depth to find the root cause and providing recommended solutions to the developer team.
- Establishing effective communication and coordination with internal IT and other divisions, such as the business team, to ensure feature alignment with system requirements.
- Verifying bug fix results and ensuring every released feature meets quality standards before entering the production environment.

PT Komitrando Emporio – Yogyakarta

Quality Assurance Staff (GMP) | *September 2025 – November 2025*

- Conducting internal audits according to GMP standards to ensure fashion bag production processes meet quality and hygiene requirements.
- Supervising and assisting external audit processes from international buyers regarding product quality and production standard compliance.

- Ensuring the implementation of **SOPs**, inspection standards, and quality documentation across all production lines (cutting, sewing, assembling, QC, and packing).
- Identifying potential quality issues and creating Corrective and Preventive Actions (CAPA) with the production and QC line teams.
- Developing Kaizen / Continuous Improvement initiatives to increase work efficiency, reduce defects, and stabilize product quality.
- Coordinating with cross-functional teams (Production, PPIC, QC Line, Warehouse) to ensure smooth processes and fulfillment of buyer quality standards.

PT Carakan Sadhana Dirgantara – Yogyakarta

Quality Assurance & Frontend Developer | *November 2023 – August 2025*

- Developing web interfaces using React.js and Next.js.
- Performing functional and compatibility testing for web applications.
- Creating and executing test cases, recording bug reports, and coordinating with the developer team.
- Optimizing application performance and layout according to client needs.

PT Sinergi Cosmetindo Laboratori – Yogyakarta

Quality Control Department | *July 2023 – October 2023*

- Inspecting raw materials, production processes, and finished products according to quality standards.
- Operating laboratory quality measurement and testing equipment.
- Generating daily QC reports and providing improvement recommendations to the production team.

Toyota Motor Manufacturing Indonesia (PT. TMMIN) – Sunter 1 Plant

Quality Control Part Business Operation Division | *August 2019 – August 2022*

- Conducted quality inspections of components prior to packing and export shipping within the Component Export Vanning Division.
- Ensured every component adhered to technical specifications and remained defect-free.
- Generated daily QC reports and coordinated effectively with the production and logistics divisions.

PT Mekar Armada Jaya (New Armada) – Tambun, Bekasi

Quality Control at Welding Department | *October 2018 – April 2019*

- Performed vehicle component welding in accordance with technical standards.
- Inspected welding results using visual QC methods and precision measurements.
- Reported inspection findings and executed repairs if any non-conformities were identified.

PT Plaza Auto Prima (Plaza Toyota) – Cibinong, Bogor

Final Inspection | *May 2017 – May 2018*

- Conducted final inspections of body repair, paintwork, and vehicle components before customer delivery.
- Coordinated with body & paint technicians to implement corrective actions for any identified defects.
- Ensured vehicles met all quality standards and were declared fit for release to customers.

SKILLS

Software Quality Assurance & Automation

- **Automation Testing:** Expert in test script development and End-to-End (E2E) testing using Cypress.
- **Performance Testing:** Experienced in conducting Load Testing, Stress Testing, and Spike Testing using Grafana k6 to measure backend performance, scalability, and system stability.
- **Testing Methodologies:** Experienced in designing Test Cases, Test Plans, and conducting functional and regression testing.
- **Bug Analysis:** Specialist in identifying complex bugs, Root Cause Analysis, and bug lifecycle management.
- **Technical Debugging & Monitoring:** Proficient in API analysis using Browser Network Tools and monitoring server resources using htop to identify CPU, memory, and backend concurrency bottlenecks.

Technical & Development

- **Programming & Scripting:** JavaScript, Node.js, Python, and HTML/CSS.
- **Web Frameworks:** Practical experience with React.js and Next.js for frontend development.
- **Performance Testing Tools:** Experienced in using Grafana k6 for API performance testing and response time analysis.
- **Version Control:** Proficient in Git, GitLab, and GitHub for code collaboration.
- **Tools & Environment:** Trello for task management, environment configuration optimization, Base URL management, and backend performance monitoring.

Quality Standards & Industrial Expertise

- **Quality Management:** Deep understanding of ISO 9001 standards.
- **Compliance & Audit:** Internal auditing, SOP verification, and CAPA development.
- **Process Improvement:** Implementation of **Kaizen** and Continuous Improvement principles.

Soft Skills

- **Cross-functional Communication:** Bridging communication between technical IT and other divisions.
- **Analytical Thinking:** Critical thinking in identifying system anomalies.
- **Problem Solving & Accuracy:** High attention to detail and speed in technical problem-solving.
